

TONONE

TONONE

How can we apply our fascination for traditional mechanics and craft tools into state-of-the art design? This challenge forms the basis of the products of design label Tonone.

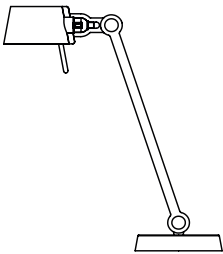

Tonone is founded in 2013 by Anton de Groof and is based in The Netherlands. The Tonone design team works together with local craftsman to produce their products.

Each step in the process of designing and producing is done with care and an eye for each detail. Tonone stands for bold, functional and no-nonsense products with an industrial character. The design team's vision is that traditional craft tools and mechanics can be a visual, as well as a functional basis for innovative product design.

Starting point for the products of Tonone is the passion for traditional mechanics. The first product line that resulted from this fascination is the lamp series 'Bolt'.

Key element in this industrial series is the joint construction that can be adjusted with a wingnut-shaped tool. Besides being a functional tool, this wingnut is integrated in the design of the lamp itself as a distinctive visual element.

DESK

Design by Anton de Groof 2013

Material	steel & aluminum		
Description	base and body in coated steel, shade in coated aluminum the shade and arms are adjustable with the wingnut		
Total weight	1 arm foot	7,1 kg	
	1 arm clamp	2,0 kg	
	2 arm foot	7,6 kg	
	2 arm clamp	2,5 kg	
Volt	220-240 V		
Max Watt	60 Watt		
Socket	E27

MR. TUBES

Mr. Tubes is a sturdy lamp design that combines pure functionality with graphical aesthetics. The black-coated steel construction holds two (or four) Philips 30W/827 fluorescent tubes and gives the lamp an industrial look; a straightforward design suitable for various locations. The lamp is dimmable and the adjustable steel cables make it possible to hang the lamp at any height.
